

The three components

Understanding how well are we doing

The working group have created an assurance model with a cultural maturity assessment. This model looks at the critical elements of asbestos management and, through a framework of Considerations and/or Key Questions that can be asked of a workplace.

Resource: Maturity Assessment

Purpose: Helps identify the levels of maturity of the organisation with respect to its asbestos management practices.

Understanding and Managing Risk:

The working group completed a Bow Tie analysis to identify the potential causes of Asbestos release leading to exposure on generation sites, the barriers or controls currently in place and the recovery measures in place should there be a failure of barriers and /or controls.

Resource: Bowtie Risk Assessment

Purpose: A tool for benchmarking your own systems for controlling asbestos.

Guidance with respect to identifying managing and/or removing asbestos.

The working group feel that the Asbestos Regulations (2016) are well supported with guidance available through the WorkSafe website.

Resource: Shared Learnings Booklet

Purpose: Help people identify potential sources of asbestos in the workplace
